Parallel to the 2024 census, a new administrative structure was implemented in Burundi. The number of provinces was reduced from 18 to 4, and the number of municipalities from 119 to 42. This consolidation was largely achieved by merging the previous administrative structures into larger administrative units, but also in some cases by changing the boundaries of the new administrative units.

As a result, there are currently no ISO 3166-2 codes, so a separate, temporary codification is given here.

Another consequence is that the sum of the individual areas is almost 10% lower than it was in the previous structure of the 2013 territorial status.

We will monitor any changes to the documentation in this regard and incorporate them promptly.

## About the maps on [www.geo-ref.net](http://www.geo-ref.net)

Each map published on our web site is free to use without costs, meanwhile the same is not modified, especially concerning our own site logotype. This is valid for all published PNG and the PDF-files.

We have published on the country page usually the population density of the country, the mostly interesting thematic map. But the real power of our offer consists in the display of your own data, drawing so your own maps with your results or relevant data.

The so generated thematic maps you can order as illustrations for reports and publications, in huger format for maps – mostly till A0 format. Also for the inclusion in PowerPoint presentations we can offer the maps, as bitmap or in vector format

So it works:
