

Somalia is no longer a unified centralised state, it is largely divided and its territory is dominated by different groups. The previous map does not reflect the real balance of power - the most striking is the separation of Somaliland and Puntland, shown in the following map. But the remaining areas are not to be understood as a unified state either, as different groups are fighting for power in them.

The borders shown in this map refer to 2018 - more recent data is not available.
